

ROAD and STREET DIRECTORY

**Roscommon County
Road Commission**

DIRECTORY INTRODUCTION AND INSTRUCTIONS

The Roscommon County Road and Street Directory contains a Roscommon County map, township maps by Town and Range, and section maps showing platted subdivisions approved by the Board of Road Commissioners.

To find a particular road or street in Roscommon County:

1. An alphabetical listing of road names can be found on pages 1- 45. There are six columns per page as follows.
 2. ROAD NAME - Find the road by name, listed alphabetically, that you wish to locate. We will use Norway for instruction purposes. Upon looking you will find there are three Norway Roads and one Norway Lane.
 3. TOWNSHIP - Note that Norway Road can be found in Ausable, Lyon and Richfield Townships. Norway Lane can be found in Denton Township.
 4. LOCATION - This column gives you a general location, such as Prudenville, S. Higgins Lake or St. Helen.
 5. PLAT OR SECTION - Suppose you know that the Norway Road you want is in the S. Higgins Lake area. This column can help you if you know the plat name or township section number.
 6. STATUS - A privately owned street will be listed as "Pvt". The Roscommon County Road Commission does not maintain these roads or have any type of jurisdiction over them. Roads with a status of "NC" are not maintained by the road commission and are not certified to the Michigan Department of Transportation, however they are available for public use and under the jurisdiction of the road commission by virtue of recorded plat dedications and provisions of the McNitt Act and Public Act 51 of 1951, as amended. Roads without a "Pvt" or "NC" designation are roads that have been accepted into the official County Road System and are Certified as such with the MI Department of Transportation. Unless the roads are included in our Seasonal Road System, they can be maintained year-around.
 7. PAGE - This column lists the page number on which you can find a map showing the road's exact location.

DEVELOPMENT AND PROGRESS OF ROSCOMMON COUNTY

The Latin word “via”, meaning “way”, was one of the earliest words used to describe a path from one place to another. In England, hundreds of years ago, certain main roads were higher than the surrounding ground. This was caused by earth being excavated from side drainage ditches and thrown toward the center - thus the obvious name “highway” originated.

The first settlers in North America found a wilderness. Homes were located along lakes, bays and rivers, and these waterways were the main means of transportation, however, as new settlers ventured inland they built crude roads to the nearest wharf. Routes in Michigan grew from Indian Trails to Super Highways as the modes of transportation advanced. Michigan was destined to become the leading state in good roads because of the manufacture of the automobile. The first road of concrete was laid in Wayne County, near Detroit, in 1909; and today, in 2004, Michigan is still one of the leading states in good highways.

From the year 1850 to 1890, very few roads were constructed in northern Michigan because of the sparse population and the railroads had spurs connecting most of the mill-towns and log banking sites. In fact, the 1870 Michigan census shows “zero” population in Roscommon County. At that time, transportation by horse-drawn wagons was fairly easy because of the lack of second-growth trees through the large stands of virgin pine. Many abandoned railroad grades later became horse and buggy trails.

Travel by early motorists was an adventure in itself. Directions were given by automobile clubs such as, “Go westerly on this trail until you come to the little white church, then take the North fork in the road”, etc.

The idea of a free road map had not yet been conceived and was not developed until the year 1914, just one short year before the birth of the Roscommon County Road Commission.

A Resolution was passed January 5, 1915, at the Roscommon Board of Supervisors meeting that a proposal for the establishment of a County Road System be placed on the ballot April 15, 1915. At this election, 580 votes were cast with 388 yeas and 192 nays. The first County Road Commission meeting of record was held June 16, 1915. Appointed commissioners were William B. Orcutt, Chairman and Henry Traubenkraut and Thomas Withe, Members. Their first duty was to ascertain which roads were suitable for adoption as County Roads. The choice of words and road locations proved the wise ability of these pioneers, for they are presently our most heavily traveled trunklines and primary roads.

1. The Houghton Lake-Roscommon Road later became US27 then M18.
2. Richfield Road later became M76, then #600 or F97. F97 runs from the South county line to the North county line. M76, now known as Old76, runs from St. Helen to the village of Roscommon.
3. Markey Road later became County Road #100.
4. West Branch State Road moved nearer Houghton Lake and became US27, then M55.
5. Top of Michigan Trail-Gladwin to Prudenville. Later became part of the Bay City-Grand Traverse Road, now M18, M55 and County Road #303.
6. The road North from Roscommon to Grayling was accepted because it was an established public wagon road.

By establishing these routes as Trunkline Highways the Road Commission was allowed assistance in the form of "State Reward Money" at the rate of \$500.00 per mile of a nine-foot road or "double reward" for Class "B" twelve-foot roads.

The first plat to be approved in Roscommon County was in the year 1875. This plat consisted of 251 lots and was laid out along the railroad tracks and known as the Plat of the Village of Roscommon. In 1879, 379 lots were added for a total of 630 lots. Roscommon's Robinson Plat and new additions in 1882 and 1890 were the only additional developments until after the turn of the century (a total of four plats containing 1,331 lots).

From 1890 to 1909, 31 plats with 21,963 lots were recorded. This decade was one of large plats and small lots, primarily around Higgins Lake; however, the first development in St. Helen and the Houghton Lake area also came in this period. The plat of the "Village of St. Helen" with 114 lots was approved June 26, 1902 and the plat of the "Village of Houghton Lake" was approved May 18, 1907 with 32 lots. From 1910 to 1919 platting slowed somewhat with only 780 lots in five plats being recorded.

The era immediately following World War I saw the beginning of substantial development of the South Shore of Houghton Lake with an increase of 44 plats containing 5,453 lots. The crash of 1929 slowed progress almost to a standstill and only three plats were surveyed between 1930 and 1939, one in 1931 and two in 1939, for a total 275 lots. During this decade with Act No. 130 of the Public Acts of 1931, the Board of County Road Commissioners incorporated the township roads into a county system at a meeting held with township officials on December 3, 1931. The first roads taken over by the Road Commission gave the road system a total of 49.29 miles which increased to 170.24 miles in 1937.

Prior to Act No. 130 (The McNitt Act) plats had been approved by county officials and the Plat Board along with the Auditor General; therefore, the first plat to be reviewed and approved by the Board of County Road Commissioners was the plat of Markey Point on

August 16, 1939.

During the early 40's, a road was completed from Peterson's Landing on the West Shore of Houghton Lake to Howe's Point on the North Shore. This opened up a new area for platting and immediately following World War II, the boom seemed to be concentrated in this area; ending the ten year period of 91 plats and 5,144 lots.

The slow down in the next decade may possibly have been due to Act No. 51 of Public Acts of 1951; however, this was not fully enforced until 1957. This law required matching funds from townships for all local roads constructed by the County Road Commission. From 1950 to 1959 there were 59 plats approved with 1,904 lots. At the end of 1959, the Roscommon County Road Commission had 129 miles of primary roads certified in its system and 587 miles of certified local roads. In addition to this mileage, a maintenance contract with the State Highway Department demanded maintenance of 109 miles of State Trunklines. The State Highway Department is now known as the Michigan Department of Transportation (MDOT).

The years from 1960 to the end of 1969 has actually shown the greatest increase in plats, lots and road mileage in the history of the county, in that 162 plats with 6,148 lots were approved. The new county plat specifications, written in the early '60's, required much better construction on streets before acceptance. Also, the square foot area of a lot in today's subdivisions is approximately five times larger than those of the early 1900's. The greatest development in the '60's was in the St. Helen area, Richfield Township.

The high rate of development continued in 1970 with the approval of 20 plats with 1,979 lots. 1971 brought 12 more plats with 465 lots and 11 plats with 1,141 lots were added by the end of 1972 to make a grand total of 442 plats with 46,579 lots. Due to recession and inflation, the combined total added from 1973 thru 1979 was only 17 plats with 643 lots. From 1980 thru 1986 development grew slowly with only 18 plats and 259 lots being added. From 1987 thru 2004, 43 plats with 698 lots were approved in Roscommon County. Grand total of 502 plats with 47,920 lots.

The certified mileage recorded for December 31, 1983 was 183.92 miles of Primary Roads and 675.29 miles of Local Roads, plus 178 miles of State Trunklines to be maintained under the State Maintenance Contract. The certified mileage record as of December 31, 2003 is 183.92 miles of Primary Roads and 681.65 miles of Local Roads, plus 178 miles of State Trunklines. Roscommon County's population has grown to the point that the State of Michigan has declared that an area surrounding Houghton Lake now qualifies for an Urban Road designation. Urban mileage for 2004: Primary Roads 36.42 miles and Local Roads 124.62 miles. 2000 population census: 25,469.

It is only necessary at the present time to snow plow and provide winter maintenance on approximately 350 miles of this system, due to the adoption of the Seasonal Road System in 1987. For each mile it is necessary to clear the shoulders and widen for snow storage, in addition to clearing the traveled portion. This increases the snow plow mileage to 2,800 miles.

Until 2003, the Roscommon County Road Commission maintained the roads in the winter out of three county garages, one located in the Village of Roscommon, one located in Houghton Lake and one located on M-55 in the Maple Valley area. The main location, including the office was in the northern most part of the county. After much thought and planning, it was decided that it would be best to combine our forces and build a new garage complex in a centralized location. The construction of our Prudenville facility began in 2001 and was completed in 2003. All operations are conducted from our Central Garage Complex.

FINANCING COUNTY ROADS

The responsibility for the maintenance and improvement of rural roads, except State Trunklines, has been delegated by the legislature to the county road commissions.

Michigan statute also requires that county roads be classified as County Primary Roads and County Local Roads. In highly populated areas, Primary and Local Roads are further designated as Urban Roads.

PRIMARY ROADS - The County Primary Road System comprises those roads of greatest importance to county motorists and are generally known as numbered routes; County Road 100, F97, etc. Primary Roads typically connect to the residential traffic generators and then go on to meet the State Trunkline System.

LOCAL ROADS - The remaining roads under county road commission jurisdiction are classified as County Local Roads. Their principal function is to provide access to the land and residents thereof.

COUNTY ROAD REVENUES - The principal source of continuing revenue for the maintenance and improvement of county roads comes from the state-collected Michigan Transportation Fund. For the most part, these revenues come from license plate fees and the state fuel tax. After deducting the costs of collections and meeting other statutory requirements, these monies are distributed to the Michigan Department of Transportation, county road commissions, cities and villages. Federal funds are available to the road commission via a statewide process. These funds can only be used on Primary Roads designated as Federal Routes. A 20% match to obtain the funds is required.

THE PROBLEM - There are not enough state-collected funds available to cover the cost of both maintaining and improving the County Primary Road System and the County Local Road System.

Since county road commissions do not have the ability to raise funds, they are dependent upon contributions from the townships and/or the county if there is to be any long-term improvement to Local Roads. There are many methods that can be used to provide the county road commission with additional funds for Local Road improvements. Obviously, the easiest way is for the townships to contribute a portion of their state-collected returns of state income taxes, sales taxes and intangible taxes. In the more progressive counties, local road support is obtained by either a county-wide millage or township millage. Roscommon County has several townships that have successfully put road millage for improvements on the ballot. A couple of our townships continue to use special assessment financing for road improvements, and a couple manage to finance road improvements from their General Fund. The road commission has two cost-sharing programs for improvements to local roads. By working together, the road commission and townships have improved the quality of the Local Road System.
